

## **2026 updates**

**Due to rapidly increasing costs pertaining to environmental compliance, we are forced to raise the env fee for all PO's to **8% not to exceed \$100****

**(previously \$50.00)**

**Also, please note the updated minimum charges. Most have stayed the same except for Gold, Silver and Tin-Lead**

**Precious metals continue to climb to record highs.**

**All precious metals quotes are based on the day quoted and will adjust to the market price when order is received. We will update you asap and need an updated PO prior to processing.**

**(if market price drops, we adjust also)**
